

CONRRAD - Institutional Governance

****Owner:**** GRECOITALICO

****Status:**** Public enterprise surface

What is CONRRAD?

CONRRAD allows an organization to delegate work to multiple AI systems while maintain

Problem

Organizations can generate AI text, but cannot safely delegate real work across multi

How CONRRAD solves it

Governance before execution:

- ****ANNY**** - Operational Director and Deployment Authority
- ****HARLEMM**** - Institutional Decision Authority
- ****SULLY**** - Execution Worker and Infrastructure Executor
- ****Evidence**** - sealed, auditable records

Why it matters

Every institution that uses AI will need to delegate work without surrendering contro

Institution Platform

Institution Platform is the enterprise destination for governed deployment.
The public environment does not expose live cloud provision.

Economics

Local SDK is free. agent.deploy() is the enterprise pay boundary.

Roadmap

Foundation -> Intelligence -> Laboratory -> Developer Platform -> Institution Platform
